

PHOTOGRAPHY / VIDEO POLICY

The Club has adopted a policy that it does not oppose registered players being photographed or filmed whilst playing or training for Rugby without their or their parents' consent, so long as that photographing or filming is not done illegally, is for private use and is undertaken by persons with a genuine interest in the player or team concerned. The Club acknowledges that the incidental photographing or filming of other players and spectators will occasionally occur.

Managers ought to advise opposition teams of this policy and should any person object, the player concerned is to be removed from the field of play and the game allowed to continue.
